IntelliTexCORE

With RFID Technology

IntelliTexCore™
Textile tube identification technology from Sonoco Alcore™ is a breakthrough, embedded core technology that enables automatic Textile tube inventory

Smart Solutions for your Supply Chain

SAVINGS IDENTIFIED

The accuracy of IntelliTexCore™ Textile tube identification technology enables manufacturers to save significant money by reducing lost inventory and ghost waste, reducing the need for working capital, eliminating costly manual tracking and simplify data tracing in the complete process.

The efficiencies of IntelliTexCore™ identification technology can reduce mistakes in the process with a 100% identification of the product and can simplify the complete supply chain.

BENEFITS IN BRIEF

INTELLITEXCORE™ ALLOWS:

- Monitor and verify shipping and delivery
- Monitor all process steps and storage visibility
- Minimize buffer stocks and working capital requirements
- Monitor and streamline production in real time
- Eliminate mix-up, manual work and waste due to inaccurate input and damaged labels
- Cut manual stocktaking errors and hours
- Optimize worker/operator productivity
- Ensure accurate order fulfilment

INTELLITEXCORE™ TEXTILE TUBE IDENTIFICATION TECHNOLOGY AT WORK

- Allows real time tracking from manufacture to consumption. A single identifier is used to automatically at the complete supply chain.
- Enables automatic reading of a full palette with yarn in one step.
- Increases operational efficiency.
- Real-time inventory data interfaces
- Eliminates manual input errors and minimizes manual stocktaking procedures.
- Allows accurate stock location. Accurate stock inventories by location enables
- forklift truck drivers to easily access stock.
- Full traceability over tube production, yarn winding, storage until disposal
